PANEL 1

Panels
These panels will be customizable by the user. They can tap and drag interchangably between these panels to rearrange their location, as well as the five quick links along the bottom. User can also make any of these panels full screen.

Panel 1 will be a detailed view of the selected window.
Panel 2 & 3 will be more selected and simplified view of information of those selected windows.

LOGO

Top 5 in list are the 5 bottom nav items on the homescreen. These can be tapped and dragged into any order.

Options below the top 5 will be in alpha-betical order. User can tap on anything in the list and the menu will close and a full page of that window will load. User can use their finger to slide the menu up or down to see full list.
